

## Copilot

Based on the dashboard image you've provided, here are the insights covering the key points you mentioned:

- **Profit:** The dashboard shows a profit of \$210,000, indicated by the green "Profit" metric with an upward arrow, suggesting growth from the previous year.
- **Loss:** While there is no specific section for loss, negative values or downward trends in the charts could indicate areas of loss.
- **Gain:** Both sales and profits display upward trends in the "Monthly Sales by YoY%" and "Monthly Profit by YoY%" graphs, indicating year-over-year gains.
- **Shipping:** The "Ship Days" metric shows '4', which could mean it takes an average of four days to ship orders.

These insights help identify areas of strength and opportunities for improvement in the business's performance. The dashboard provides a comprehensive view of sales across various dimensions such as customer segments, payment modes, and regions.
